

Important Marketing Analytics KPI

1. Click Through Rate (CTR) - Measures how many users clicked after seeing the ad. Helps in evaluating engagement & creative effectiveness.

$$\text{CTR} = (\text{Clicks} / \text{Impressions}) * 100$$

2. Conversion Rate - Measures how many clicks converted into actual customers

$$\text{CR} = (\text{Conversions} / \text{Clicks}) * 100$$

3. Lead Conversion Ratio - Measures how many leads became customers.

$$\text{LCR} = (\text{Conversions} / \text{Leads}) * 100$$

4. Cost Per Click (CPC) - Measures average cost for each click. Lower CPC means cost-efficient traffic acquisitions.

$$\text{CPC} = \text{Spend} / \text{Clicks}$$

5. Cost Per Lead (CPL) - Measures cost incurred for generating one lead.

$$\text{CPL} = \text{Spend} / \text{Leads}$$

6. Cost Per Acquisition (CPA) - Measures customer acquisition cost. Lower CPA is generally better.

$$\text{CPA} = \text{Spend} / \text{Conversions}$$

7. Return on Investment (ROI) - Measures campaign profitability. A positive ROI means a profitable campaign.

$$\text{ROI} = ((\text{Revenue} - \text{Spend}) / \text{Spend}) * 100$$

8. Return on Ad Spend (ROAS) - Measures revenue generated per unit of ad spend. ROAS > 1 means revenue exceeds ad spend.

$$\text{ROAS} = \text{Revenue} / \text{Spend}$$

9. Impressions to Click Ratio - Shows user engagement from visibility to interaction.

Impressions to Click Ratio = Clicks / Impressions

10. Funnel Drop-Off Ratio - Measures user loss between stages.

Drop Off Ratio = ((Previous Stage - Current Stage) / Previous Stage) * 100

- a. Impressions → Clicks
- b. Clicks → Lead
- c. Lead → Conversions

11. Bounce Rate - Measures users leaving without interaction.

Bounce Rate = (Single Page Visits / Total Visits) * 100
